

Geocasanet

Testimonial

We bought our Italian house through Geocasanet who proved to be both reliable and trustworthy with an excellent knowledge of the local market. As well as helping us buy they also 'walked us through' all of the necessary formalities such as opening an Italian bank acc and registering with the tax office!

We saw a range of properties until we were able to narrow the search to exactly what we wanted and were able to complete the purchase with the minimum of fuss within 8 weeks. Like most older properties, ours needed a certain amount of restoration. However, no problem as Giancarlo, as a fully qualified & experienced surveyor, was able to provide accurate estimates of the work required, supervised the work in progress & ensured completion of the work to a high standard.

It hasn't stopped since completion of the work though as Barbara now looks after the house on an ongoing basis – ensures we pay all the local bills on time, checks on the property when empty and most importantly is able to organise an efficient plumber, electrician, etc whenever we need one urgently.

We have no hesitation in recommending Geocasanet to you – you will soon find that they are totally honest, reliable and trustworthy in everything they do.
